## PROJECTS

---

### Local LLM Financial Statement Assistant

*Technologies: Python, Streamlit, LangChain, ChromaDB, Ollama LLMs*

- Developed a secure financial statement assistant using a locally running LLM, enabling safe analysis of sensitive bank statement PDFs without data leaving the device.
- Implemented a complete RAG pipeline with LangChain and ChromaDB, allowing natural language queries such as “How much did I spend in December?” with accurate context retrieval.

### Digital Influencers Marketing Assistant

*Technologies: Python, Streamlit, Gemini API, YouTube Data API v3*

- Created a Streamlit-based application to assist SMEs in Tamil Nadu with influencer marketing, integrating Gemini API for website analysis and YouTube Data API for influencer recommendations.
- Designed a user-friendly interface to help SMEs with limited digital expertise improve market reach through targeted influencer collaborations.

### Event Management Project

*Technologies: React.js, MongoDB, Express, Tailwind CSS, WebGL (Fluid Dynamics)*

- Built a full-stack web application to centralize event scheduling for college clubs, automating event coordination tasks.
- Integrated real-time room availability tracking to improve accessibility and reduce booking conflicts.
